

Qian Jiang

202316187@stu.neu.edu.cn | (+86) 182 1144 5116 | Huizhou,
Guangdong, China

Research Interests

Trustworthy AI; Multimodal LLMs; Vision-Language Models; AI Agents; Embodied AI

Education

Peking University Shenzhen Graduate School

2027.09 - 2030.06

M.S. in Computer Science

- Admitted

Northeastern University

2023.09 - 2027.06

B.Eng. in Computer Science and Technology, School of Computer and Communication Engineering

- GPA: 4.19/5.00 (8/196, top 4.08%); CET-4: 579, CET-6: 528; Selected coursework: Calculus I/II (99), Probability Theory (100), Optimization (97), Linear Algebra (92)

Publications

Zirui Song*, Qian Jiang*, et al. Audio Jailbreak: An Open Comprehensive Benchmark for Jailbreaking Large Audio-Language Models. ACL 2026 Main. (Co-first author, CCF-A)

Qian Jiang, Zhecheng Shi, et al. OmniFood-Bench: Evaluating VLMs for Nutrient Reasoning and Personalized Health Advice. ICME 2026 Oral. (First author, CCF-B)

Zirui Song*, Guanghan Ouyang*, ... Qian Jiang ..., et al. ManipLVM-R1: Reinforcement Learning for Reasoning in Embodied Manipulation with Large Vision-Language Models. AAAI 2026. (Contributing author, CCF-A)

Fan Ji*, Juncheng Yang*, ... Qian Jiang ..., et al. FineState-Bench: Benchmarking State-Conditioned Grounding for Fine-grained GUI State Setting. ACL 2026 Findings. (Contributing author, CCF-A)

Research Experience

Mohamed bin Zayed University of Artificial Intelligence, advised by Prof. Xiuying Chen

- Conduct research on trustworthy AI, including multimodal LLM jailbreak attacks and reliable AI-generated text detection.

Language and Intelligent Systems Lab, Northeastern University, advised by Prof. Miao Fang

- Conduct research on VLMs and agents; serve as the lead student coordinator for laboratory recruiting and operations.

Selected Projects

Audio Jailbreak

Built AJailBench, an open benchmark with 1,495 curated adversarial samples across ten policy-violating categories. Proposed APT, a toolbox of ten temporal, frequency-domain, and hybrid perturbations; Bayesian optimization improved attack success by about 10%.

OmniFood-Bench

Built a three-stage VLM evaluation framework spanning perception, quantitative reasoning, and safety-critical advice, with 1,208 high-quality samples based on MM-Food-100K; found the best safety-advice accuracy to be only 46% in high-risk dietary settings.

Honors & Activities

- 2026 Mathematical Contest in Modeling Finalist (top 0.1%-2%)
- Third Place, RoboCup China Beijing Academy of AI Embodied Foundation Model Challenge
- Third Prize, National Final of the Global AI Algorithm Elite Competition
- Technical blog: 18 posts, 70 upvotes, and 89 bookmarks
